RePET carrier bag made of recycled soft drink bottles

Product information

Van der Windt Verpakking BV has expanded its range to include the RePET carrier bag. What makes this woven carrier bag, ('shopper') special is that the source of the raw materials is recycled soft drink bottles made of PET.

Most of the over five billion litres of pre-packaged soft drink products sold in the Netherlands each year is packaged in PET bottles. A very high 95% of the bottles are returned. Recycled PET not only finds its way back into the soft drinks industry but is also used for a wide range of other applications.

With the introduction of the RePET carrier bag we are responding to the business world's increasing interest in ways to stand out as a 'sustainable' concern. The exceptionally strong, attractive and long-lasting carrier bags, which will be added to the range under the motto 'I used to be a plastic bottle', are ideal advertisement carriers or promotional give-aways for companies that set great store by sustainability.

Delivery information

The RePET shopper can be printed with either a matt or glossy finish. The woven material comes in a single quality, 150 gram/m², which ensures a robust bag that can be re-used many times over a long period. The carrier bag can be supplied in a variety of models, colours and sizes. The minimum quantity of bags that can be produced and printed with your own design is 5.000 pieces.
